

LINCOLN UNIVERSITY

DI 244 – Vascular Scanning (Lab)

Spring 2015 Course Syllabus

Credit: 3 units (90 hours of lab)
Class Hours: Tuesday 9:00 AM – 12:35 PM
Thursday 9:00 AM – 12:35 PM
Instructor: Dr. Seyed A Sadatian, RDMS (Abd), RVT, RDCS
Contact: sasadatian@yahoo.com or ssadatian@lincolnuca.edu
Office Hours: Tuesdays 1:15 – 2:15 PM or by appointment

Required Textbook:

Introduction to Vascular Ultrasonography, 5th edition [Elsevier-Saunders], 2005, Zwiebel, Pellerito
ISBN-10: 0-7216-0631-8; ISBN-13: 978-0-7216-0631-6

Additional recommended textbooks and instructional materials will be given during classes.

Prerequisite: DI 234

Course Description

The focus of this course is Peripheral and Abdominal Doppler scanning. Laboratory sessions are provided to acquire intermediate scanning skills necessary to succeed in the clinical setting. (3 units) *Prerequisite: DI 234*

Learning Objectives

Upon satisfactory completion of this course, the students will be able to:

- Assist patients to and from the exam area
- Explain the examination and instruct the patient properly
- Describe a scanning survey and explain its importance prior to taking images
- Explain the selection of the proper transducer for the exam
- Explain the elements of film labeling
- Describe optimal techniques related to field size, power, gain, and contrast for image interpretation
- Present films in a logical sequence
- Describe the anatomy, physiology, normal variations, and pathology of all vascular except intracranial
- Explain the significance of clinical tests relevant to pathology within vascular
- Explain the sonographic findings and differential diagnosis of findings

Ultrasound Hands-on Laboratory Training

Ultrasound hands-on laboratory training will involve:

- Using the theoretical material presented during lectures as a basis for hands-on training
- Applying theoretical knowledge to practice
- Learning to follow proper ultrasound scanning protocols
- Acquiring optimal quality of diagnostic images
- Proper operating of ultrasound machines and maximizing the us machines' capabilities
- Gaining practical experience under the guidance of the lab instructor

Instructional Methods

- In-class hands-on scanning, using ultrasound machines and other lab equipment
- Live demonstration ultrasound imaging of organs and blood vessels
- The instructor's guidance to developing students' scanning skills
- Group work, discussions and ultrasound case analysis
- Ultrasound laboratory video demonstrations and presentations

Ultrasound Hands-on Laboratory Examination

During the Hands-On Lab Examination, students should demonstrate:

1. The understanding of the information presented primarily during the lectures and hands-on laboratory training.
2. The knowledge of the anatomy, physiology, normal variations, and pathology of the human body.
3. In-depth knowledge of the ultrasound scanning protocols and the ability to present images in a logical sequence.
4. The use of different acoustic windows to achieve the best picture quality possible.
5. The ability to select the proper transducer for the exam.
6. The knowledge of the ultrasound machine capabilities for the optimal quality of diagnostic images (frequency, TGC, B-mode, focal zones, color scale, gain, depth, etc.).
7. The ability to describe optimal techniques related to field size, power, gain, and contrast for the image interpretation.
8. Knowledge of the elements of the image labeling.
9. Explanation of the sonographic findings and differential diagnosis of abdominal pathology.
10. Since the intent of the lab examination is for the student to demonstrate the knowledge of the scanning protocol, students are not allowed to ask questions and discuss the scanning procedures with classmates. Reference materials are not allowed.

Midterm / Final Exam Grading System

- Midterm and Final Exams will be performed on scheduled days in the presence of the lab instructor.
- The length of the examination will depend on the type of the ultrasound protocol.
- The score (%) will be determined by acquiring the ratio of the correct / incorrect images recorded by the student.
- Depending on the quantity of the required images of the particular protocol, each image will be valued at certain amount of points.
- The points for missed (or completely incorrect) ultrasound images will be subtracted from the total 100% score.
- The added score of the correct ultrasound images (according to the protocol requirements) will represent the total examination grade.

Testing

Ultrasound Hands-on Laboratory Examination:

- Final ultrasound hands-on examination - students have to demonstrate understanding of information presented during lectures and hands-on laboratory training.
- Students have to perform different ultrasound protocols and demonstrate scanning technique and images in B-mode, M-mode, Color and Spectral Doppler.
- Students required to schedule time and date 2-3 week ahead for Ultrasound hands-on laboratory examination.
- Students need to be at the Ultrasound Lab, ready to start scanning at the exact scheduled time.
- If a student is late for the scheduled exam time, the time **CANNOT** be changed and the student **WILL NOT** get a full hour! The student will only have the remaining time left in the hour.
- Only one time **RETESTS** will be given to students with a valid excuse such as illness, family emergency, unforeseen heavy traffic or natural disaster.

Grading

Evaluation	Weighting
Attendance	20%
Tests / Quizzes	20%
Midterm	30%
Final exam	30%
Total	100%

%	Grades
100-94	A
93-90	A-
89-87	B+
86-84	B
83-81	B-
80-78	C+
77-76	C
75-74	C-
73-72	D+
71-70	D
69<	F

Schedule: DI 244 – Vascular Scanning
Spring 2015

Weeks	Date	Topics	Quiz
1	01/20/15	CCA, ECA, ICA, Vert A, 2D, Duplex right	
1	01/22/15	CCA, ECA, ICA, Vert A, 2D, Duplex left	
2	01/27/15	CCA, ECA, ICA, 2D, Duplex bilateral	1
2	01/29/15	CCA, ECA, ICA, 2D, Duplex bilateral	
3	02/03/15	Abdominal Aorta, 2D & Duplex	2
3	02/05/15	Abdominal Aorta, 2D & Duplex	
4	02/10/15	IVC, hepatic vein, 2D & Duplex	3
4	02/12/15	IVC, hepatic vein, 2D & Duplex	
5	02/17/15	Portal vein, hepatic artery 2D & Duplex	4
5	02/19/15	Portal vein, hepatic artery 2D & Duplex	
6	02/24/15	Renal Vascular	5
6	02/26/15	Renal Vascular	
7	03/03/15	MIDTERM EXAM	
7	03/05/15	Arterial upper extremity right	
8	03/10/15	Arterial upper extremity left	6
8	03/12/15	Arterial upper extremity bilateral	
9	03/24/15	Venous upper extremity right	7
9	03/26/15	Venous upper extremity left	
10	03/31/15	Arterial Lower extremity right	
11	04/02/15	Arterial Lower extremity left	8
11	04/07/15	Venous Lower extremity right	
12	04/09/15	Venous Lower extremity left	9
12	04/14/15	Random vascular scanning	
13	04/16/15	Random vascular scanning	10
13	04/21/15	Random vascular scanning	
14	04/28/15	Random vascular scanning	
14	04/30/15	Random vascular scanning	
15	05/5/15	FINAL EXAM	

Makeup exam: 05/18/2015

Syllabus updated: 1/30/2015

Note: Instructor may change this syllabus and course schedule at any time according to the judgment as to what is best for the class. Any changes will be declared ahead of time in class.
