COURSE DESCRIPTION

Critical thinking (E75) considers the cognitive skills and communicative strategies for defining, applying, analyzing, synthesizing and evaluating information. The course includes structural and operational approaches to task/mission analysis, decision-making, change forecasting, adaptation, and

evaluation. Systems approach to analysis and solution of complex problems. Conceptual issues in problem definition, goal determination and measurement of effectiveness.

OBJECTIVES

Skills emphasized include ability to examine objectively various sides of issues as demonstrated in oral written text and course-assigned exercises. Students will demonstrate increased ability to effectively use the procedures involved in systematic problem solving based on text and class selected examples. Additional skills targeted include increased ability to develop and apply academic and professional communication skills, including improved ability to interact appropriately with challenging materials at an increased level of communicative competence as measured in exercises, quizzes, midterm and .final exams.

METHODOLOGY

The course sessions will include lectures , A/V-augmented presentations (text-based and other topically related slides and relevant audio/video/web resources), written and oral classroom exercises applying course concepts, small group and classroom discussions, student presentations of individual and group assignments based on course units, with emphasis on engaging students in learning by doing.

STUDENT RESPONSIBILITIES

Students are expected to attend class punctually and fully (arriving on time and leaving the classroom only at the scheduled break and end times). Students are expected to participate in individual and group work in a productive manner, to complete assignments according to schedule and at a level appropriate to university rubrics, and to take personal responsibility for meeting the objectives of the course.

TOPICAL OUTLINE

Topics covered include observation skills, appropriate language skills and encoding strategies, differentiating among fact, inference, judgment, recognizing fallacies of reasoning and evaluation, understanding viewpoint, analyzing character, logic, and emotion in persuasion.

For each of the units (as well as additional assignments given in class), students will do the following:

- **Read** assigned materials with care and understanding,
- **Reflect** on the assignments in writing (a brief paragraph or two), discussing your thoughts on the primary content; include points of personal interest.
- **Review** main points of the reading and create a personalized three-level primary question and answer outline on a minimum of three or four selected items from the assigned readings. The outline should develop the main topics in question form with a clear and concise answer followed by significant details with definitions and examples, including your own ideas and evaluations.
- **Email** your assignments to me at profsylvia@gmail.com, with your outline and reflections attached or in the body of your email. Be sure to keep a copy of the email for yourself and add it to your ePortfolios/PowerPoint presentations for midterm and final submission and sharing.

Assignments are due on the dates indicated on the schedule below.
