COURSE DESCRIPTION: This course provides a basic study of the structure and function of the human body. Upon completion, students should be able to demonstrate basic understanding of the fundamental principles of anatomy and physiology. (3 units) *Prerequisite: SCI 31 or equivalent*

COURSE OBJECTIVES: Upon completion, students should be able to:

- demonstrate basic understanding of the fundamental principles of anatomy and physiology;
- explain the basic concepts of homeostasis and demonstrate the key concept as the most important unifying theme of the body systems;
- describe basic chemical and physical principles that are of particular importance in anatomy and physiology;
- demonstrate knowledge of functioning of each organ separately.

INSTRUCTIONAL METHODS:

Instructional methods will include lectures, classroom activities and presentations.

EVALUATION:

1. Homework and Quizzes — Written homework assignments will be given periodically; additionally, unannounced quizzes will be given during class time.
2. Final examination.

To successfully complete this course, the student must pass the quizzes, homework and final exam portions with a 70% or better. Students should attend all the class meetings. However, considering possible urgent situations, students may be absent from maximum four class meetings with prior notice to the instructor. Three late arrivals would affect the grade.

The term grade is based on attendance, class activity, project, midterm and/or sum of quizzes, and final examination. Individual projects will be assigned at the beginning of the semester. Homework and project are due by the last meeting before the final examination. No project or homework will be accepted after the due date.

If student missed the class without valid reason no make-up for quizzes and presentations will be allowed. No make up for missed or failed midterm. Final examination if failed can be retaken only once. Student can retake only one unsatisfactory quiz. Dictionaries can be used during the class time. No electronic devices during the test time.

During the written exam, any student observed in a situation that could be considered suspicious (e.g., an open book within his/her field of vision, looking around or checking a cell phone or other wireless device, etc.) but no cheating is observed, will be warned. Once warned, any applicant found cheating on written exam will be failed for the exam and prohibited from retaking the written exam without permission from the dean.

Student cannot leave the room during the test/exam. As soon as student leaves, the exam is considered finished.

Lecture is not a substitute for textbook. Students should read textbooks and use other sources to be prepared for the tests. Lecture is to guide the student for preparation to subject.
