Course Description:

An in-depth examination of the development and expansion of banking: legal aspects of banking, syndication techniques; letters of credit/ banker's acceptances; foreign exchange; offshore banking; the global debt crisis and debt rescheduling.

Prerequisites: No prerequisite courses are required

Course Objectives:

1. To learn and understand the banking system
2. To understand the need for a financial system
3. To familiarize students why banks exist, the main services they offer, recent trends, and relevant knowledge of banking.
4. To learn the nature and theory of banking, both in the United States and throughout the world.
5. To understand optimization techniques in the banking world.
6. To analyze the world of banking.
7. To examine banking in the present day context

Methodology:

The course will be conducted in the form of lectures and discussions on the present economy. Case studies will be provided.

The focus of this course is to show the relevance and application of economics in the banking world and to examine new laws pertaining to this area.

An oral and written report is required on the banking world. The report must not be copied from the internet and this should show knowledge of what the student has learned from the research.

The banking industry has experienced marked changes in recent years as deregulation has allowed banking firms to diversify into the broad financial services area. Commercial banks have become full-service financial firms, offering a range of nontraditional financial services including insurance, securities business, pensions and the like.

The rapidly evolving environment poses both threats and opportunities which will be discussed at length. Capital must be effectively managed and will be the subject of several discussions.
